

SPRING CLEAN QUICK START

WHAT WE DO, WHAT IT COSTS, AND EVERYTHING ELSE YOU NEED TO KNOW

WHAT IS A SPRING CLEAN?

Just like a car, computers need regular servicing. Over time the computer gets cluttered and disorganised – often causing it to run slowly and crash.

While there are a few things that can be done to help, often the best thing to do is to get a spring clean.

THE FINE PRINT

While we do everything we can to make your life easier, there are some things you need to be aware of:

- Nth Degree is not liable for damages including loss of data, lost profits, business interruption etc.
- We can only install software we have access to and that you're licensed to use - if we don't have the disks and can't get them, you must provide them.
- Some things can only be installed on-site (printers, cameras etc), so if you're not wanting on-site setup you'll need to do these things yourself.
- If you have any questions don't hesitate to ask.
